

# Network Engineer Apprenticeship

## Network Engineer - Level 4

The Network Engineer Apprenticeship will teach apprentices how to design, install, maintain and support communication networks within an organisation or across organisations.

The role of a Network Engineer is to understand network configuration, cloud, network administration, monitoring tools and be able to give technical advice and guidance to their users such as staff, clients, customers or suppliers.

As part of the programme, apprentices will work closely with a dedicated trainer and support team to guide them through the units providing a deeper understanding and confidence to enter the workplace feeling fully prepared.
